Emre Erkorkmaz

Senior Full-Stack Engineer (React, TypeScript, Node.js)

Remote contracts hello@emreerkorkmaz.dev emreerkorkmaz.dev linkedin.com/in/emre-erkorkmaz-5b9628161
github.com/EmreErkorkmaz

SUMMARY

Full-stack engineer building React frontends and the Node.js services behind them since 2021, for a quick-commerce and food-delivery platform with millions of daily orders and an online brokerage with real-time trading. Brought onto critical, deadline-bound work and trusted with large inherited codebases. Available for remote contracts, hourly or daily.

CORE COMPETENCIES

React & TypeScript • Node.js & Express • REST APIs & BFF • MongoDB & Redis • Next.js (SSR) • Docker & CI/CD (GitHub Actions) • Playwright & React Testing Library • AI-assisted development (Claude, GitHub Copilot)

EXPERIENCE

Software Engineer II, Frontend · Quick commerce and food delivery — May 2023 – Sep 2026

- Shipped across five teams and three verticals (food, local shops, water), on both merchant and admin panels, including two years full-stack on the restaurant order flow, which handles millions of daily orders.
- Maintained the team's Node.js BFF and services (Express, MongoDB, Redis), from new REST endpoints to security updates.
- Brought the restaurant app's order and menu pages to mobile (PWA, then native webview) ahead of deadline; recognised with an internal company award.
- Managed the technical side of an AI live chat integration with an external vendor; it cut customer-support costs by 80%.

Frontend Developer · Online brokerage (fintech) — Jun 2021 – Jan 2023

- Founding frontend engineer on critical new React projects, making their frontend architecture decisions.
- Built and optimised real-time trading features on large volumes of live market data, across React, Angular and AngularJS projects.
- Mentored junior developers and interviewed frontend candidates.

Frontend Developer · Software company (e-commerce and survey products) — Mar 2021 – Jun 2021

- Built the storefront of a multi-language e-commerce platform before launch (Next.js, SSR) and supported its admin panel.
- Delivered a survey product with a points-based reward system (React, GraphQL).

PROJECTS

emreerkorkmaz.dev · Bilingual business site for client enquiries; Lighthouse 100 in all four categories, deployed automatically to Cloudflare Workers with a GitHub Actions build-and-audit check on every pull request.

SKILLS

Frontend	TypeScript, JavaScript, React, Next.js (SSR, Pages Router), PWA, Redux (Redux Saga, RTK Query), HTML5 / CSS3, Web accessibility (keyboard navigation, ARIA, semantic HTML)
UI	Tailwind CSS, Material UI
Backend & APIs	Node.js, Express, REST APIs, GraphQL, WebSockets
Data	MongoDB, Redis, PostgreSQL
Testing	Playwright, Cypress, React Testing Library, Jest
DevOps & cloud	Docker, CI/CD (GitHub Actions), Git (GitHub, GitLab, Bitbucket)
AI	AI-assisted development (Claude, GitHub Copilot)

EDUCATION & LANGUAGES

B.Sc. Computer Engineering, Sakarya University, Faculty of Computer and Information Sciences, 2020 · English (C2), Turkish (native)
